

TIGER PLUS

Our long-term goal is to keep offering the best quality on the market.

Our most popular garment **TIGER PLUS** has already been certified according to standard **EN 469:2020**.

The parameters of TIGER PLUS significantly exceed the standard and rank us among the strongest players in the area of intervention suits.

This European standard substitutes EN 469:2005 and sets new requirements on protective clothing for firefighters to ensure their safety during interventions.

We are intensively working on recertification of all our garments.
